NOTES OF CHARGING

1. Battery can be charged after the battery has been fully discharged. The charger can be charged directly. When the battery is charged to 80% of the full capacity, the charging process slows down to protect the battery. When the battery is charged to 90%, the charging process stops. If the battery has been fully charged, the charger will not function until the battery is disconnected.
2. The charger can be charged directly. When the battery is charged to 80% of the full capacity, the charging process slows down to protect the battery. When the battery is charged to 90%, the charging process stops. If the battery has been fully charged, the charger will not function until the battery is disconnected.
3. When the battery is being charged, please make sure that the charger is placed in a horizontal position to ensure proper heat dissipation. If the charger is tilted, the internal components may overheat, causing damage to the charger or battery.
4. If the charger develops a strange smell, please unplug it immediately and contact the manufacturer for assistance.
5. Do not charge the battery while it is being used or in a high-temperature environment. Overcharging can damage the battery and reduce its lifespan.
6. Do not disassemble the charger or battery. Disassembling the charger or battery can lead to a risk of electric shock or fire.
7. If the charger or battery is not being used, store it in a cool, dry place away from direct sunlight.
8. When the charger or battery is not being used, unplug it from the power source to prevent unnecessary energy consumption.

ASSEMBLE INSTRUCTION

1. Assemble the rear wheels (P2):
   a. Install the rear wheels onto the hole of wheel axle. Cover the hub cap lastly.
   b. Tighten the screws on the rear wheel until they are securely fastened.
2. Assemble the front wheels (P2):
   a. Install the front wheels onto the hole of wheel axle. Cover the hub cap lastly.
   b. Tighten the screws on the front wheel until they are securely fastened.
3. Assemble the spoiler (P3):
   a. Assemble the spoiler onto the car body, making sure that it is positioned in the right place.
4. Assemble the steering wheel (P3)
   a. Connect the terminal of battery and charger, and then plug the charger into the 230-240V AC mains socket.
5. Connect the battery terminal with circuit together, (the fuse, which will protect the car and make sure the car cannot start if the conditions are abnormal)
6. After the battery is fully charged, you can start the car normally.
7. The car will go, sit down please"
